First Clubfoot Africa Conference  
19-20 November 2020

Open invitation by SAPOS

There should not be a single neglected clubfoot in Africa!

We have the keys to achieve this!

Come and join us in Cape Town at the first Clubfoot Congress in Africa!

We will focus on the unique challenges of treating clubfeet in limited resource settings. It is being done!

How can it be rolled out more successfully?
What is the approach to neglected clubfeet?
What new developments are there?

International and local experts will guide the discussions and demonstrations.

The target audience is truly anybody that directly or indirectly is involved with clubfoot care.

If you are in a leading position; please use your influence to motivate people to come to this meeting. We need to move forward now! We have the simplest of techniques; we need to overcome the obstacles to implement it properly.

Hope to see you in the Mother City!

Ryno du Plessis  
President SAPOS
